

## INJECTOR CLEANER

GP-ICM

### System Functionality

- Hold
- Pulse Flow Sheet
- Open Flow Sheet
- Leak Test
- RPM Test
- Digital AC Voltage Display
- Injector Coil Test
- Emergency Panel
- Solenoid Value
- Pressure Regulator
- Hold
- Drain

New Green Power Fuel Injector Cleaner has been developed ingeniously to clean the clogged injector and assesses other conditions such as flow over, low flow and spray pattern.

Multi point fuel injection is much more efficient in terms of efficiency and performance, impure quality of fuel results in clogging of injector and costly to replace.

The machine has been specially designed to clean and test fuel injectors of all makes and model of MPFI cars on road in India.

## FEATURES

- Microcontroller Based control systems.
- Automatic or manual mode selectable.
- Clean and test petrol injectors.
- Easy mounting of injectors by a single screw for cleaning.
- Backlit LCD display for longer life.
- Fuse in DC circuit for battery safety.
- Pressure regulator provided for fuel.
